We create products for your hotel rooms that provide your guests the most comfortable night of sleep.

QUALITY

We manufacture all our products in-house and use the best national and international selection of raw materials, so that we can continually ensure the best quality.

DURABILITY

We have zero complaints since the first Hotel supply in 2003. Almost 100% of our customers still use the first mattresses they purchased from us.

COMFORT AND SAFETY

Colunex products exceed the strictest international standards for comfort, safety and guarantee. Every product that leaves our facilities goes through strict quality controls.

DESIGN AND CUSTOMIZATION

Thanks to the combination of the most advanced technology and equipment, with the excellence of handmade work, we create exclusive and customized solutions for each hotel project.

INNOVATION AND DEVELOPMENT

We are continually investigating techniques to provide a healthier and more sustainable sleep.

FLAME RETARDANT MATERIALS

We only work with fire-retardant fibers to ensure that the fire-retardant properties of the products will never be affected, even after years of use and multiple washes.

CERTIFIED MATERIALS

All our raw materials are OEKO-TEX Class 1 and Reach certified. All of the plywood in the bed bases comes from controlled forests and is environmentally certified.

Complete solutions adapted to your hotel

MATTRESSES

Colunex Benefits:

- ✓ Exclusive Colunex technology
- ✓ Independent comfort
- ✓ Use of the entire surface
- ✓ Flame retardant materials
- ✓ OEKO-TEX 100 Class 1 certified

BED BASES

Colunex Benefits:

- ✓ Anti-noise structure
- ✓ Anti-vibration structure
- ✓ Ventilated structure
- ✓ Eco-certified woods
- ✓ Customization

HEADBOARDS

Colunex Benefits:

- ✓ Customization
- ✓ Quality and durability
- ✓ More than 30 different models
- ✓ Certified materials
- ✓ Flame retardant coatings

Welcome to Colunex

Where the love for sleep has been around for over 36 years!

Colunex is a 100% Portuguese company, founded in 1986 with the dream of producing the most comfortable mattress in the world.

Since then, we have worked to provide a complete sleep experience, from the most comfortable mattresses and pillows, to modern and personalized beds, which together create a dream bedroom.

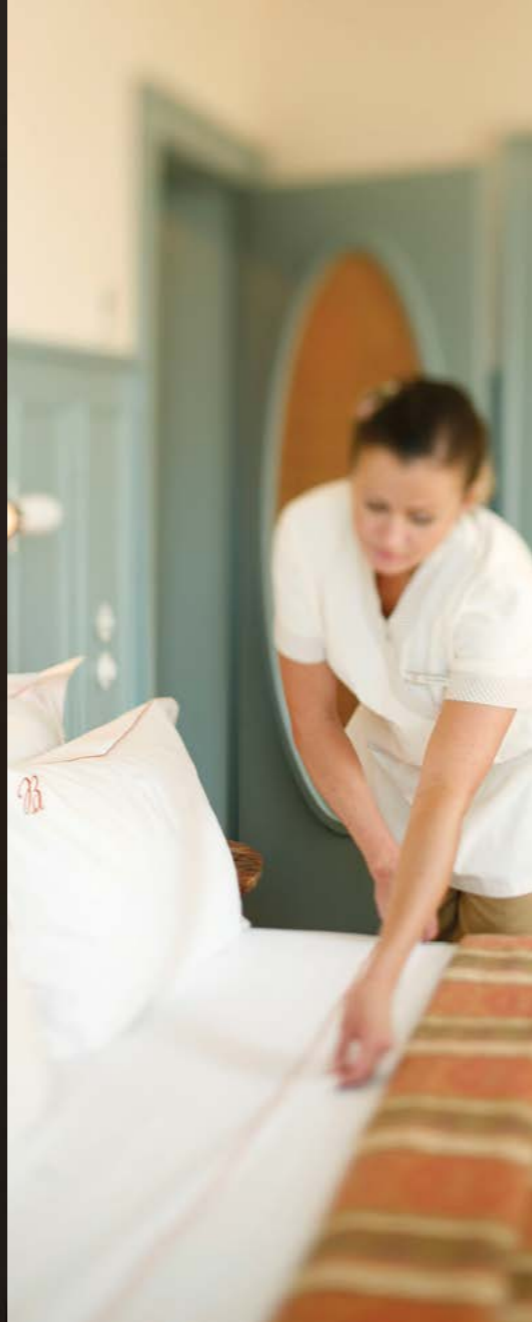

At Colunex, we internally control all phases of planning, research, development, design, production, distribution, assembly and support of our products. Thus, we guarantee compliance with the most demanding safety and quality standards, providing a personalized and direct service. We are proud to say that more than 120 Colunex professionals develop unique solutions that make our customers' dreams come true.

Since a good night of sleep is essential to live longer and better, our goal is to continue to push the limits and be able to offer a more restful sleep restful sleep, in a luxurious, pleasant and comfortable environment.

We are certain that the differentiating comfort of Colunex products can contribute to optimizing the excellence of comfort to be experienced by your hotel guests.

★★★★★

THE COMFORT OF AWARDED HOTELS

8 reasons to offer Colunex comfort to your guests

Exclusive Products

We develop and produce mattresses, bed bases, headboards and sleep complements that will be part of the success of your hotel.

Individual Comfort

Colunex mattresses allow an independent comfort, which means that in a double bed, the movement of one person is not felt by the other.

Personalization

We have extensive experience in the development of hospitality projects, from small luxury boutique hotels to large luxury hotel chains.

Exclusive Solutions

We create unique and customized solutions for each project. It can be a mattress with non-standard firmness, shapes and dimensions, a bedbase or a headboard of your own design.

Quality Tests

We work with the best national and international selection of materials and textiles, all previously subjected to rigorous quality tests.

Internal Control

We manufacture all of our products and are known for their quality and longevity. We work according to high quality standards, meeting production and delivery deadlines.

Full Service

We internally control all phases of planning, research, design, development, production, delivery and assistance. Colunex will provide you with a complete and direct service.

Comfort and Safety

We prioritize comfort, safety and quality, so that you can give your customers the best night of sleep.

The pillars of our production

Know-how and high technology

Specialized multidisciplinary teams combine the most advanced technology and state-of-the-art equipment, with the excellence of the work of our professionals.

Fully customizable products

We create bespoke products to respond to the needs of all generations.

Strict quality control

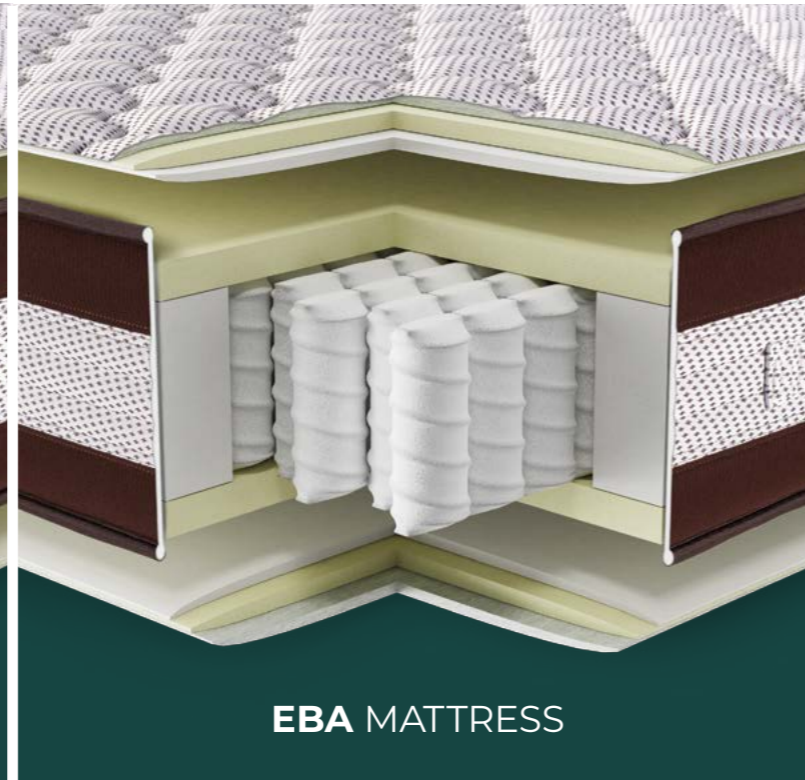

Colunex products exceed the most stringent international safety, guarantee and quality standards. Each product that leaves our facilities undergoes the most rigorous quality control throughout its production stages.

MATTRESS COLLECTION

The 6 biggest advantages of Colunex mattresses

POCKET SPRINGS™

We produce our pocket springs in-house using our exclusive ProTech Springs™ technology. We use high-grade carbon steel, tempered and electronically controlled.

INDEPENDENT COMFORT

We provide independent and isolated comfort, which means that in a double bed, the movement of one person is not felt by the other. This is possible due to our ProTech Springs™ technology, which produces springs that move individually and vertically, without transferring any movement to adjacent springs.

USE OF THE ENTIRE SURFACE

Our mattresses are constructed in such a way that the entire surface of the mattress can be used, without the sensation of rolling out when approaching the edges.

ANTIBACTERIAL MESH WITH TREVIRA CS

In addition to the flame retardant feature, Trevira CS fiber is also hypoallergenic. This means that the mesh protects the mattress, preventing the mites that cause allergies from settling, consequently leading to greater mattress hygiene and durability.

FIREPROOF MESH WITH TREVIRA CS

The mattress covering mesh is composed of Trevira CS fiber, the best fire-retardant fiber on the market, which, in addition to meeting the NF EN 597 - PART 1 and 2 fire standards, does not require any chemical treatment. This means that the fire-retardant properties are not weakened during the use and cleaning of the mattress.

OEKO-TEX All our textile coverings and foams are Oeko-Tex 100 Class I certified, which means that, in addition to not having substances harmful to the body or the environment, they belong to the category with the strictest criteria, being even suitable for use in baby products. None of our mattresses use CFCs or toxic adhesives.

Colunex mattresses details

MATTRESS UNION ZIPPER

Zipper placed along the entire length of the mattress, perfectly joining two mattresses and transforming it into a comfortable double bed.

SEASONAL ROTATION LABEL

Quarterly indicator to facilitate the periodic rotation of the mattress and increase its durability.

HANDLES

4 reinforced handles to facilitate the rotation and handling of the mattress.

CUSTOM EMBROIDERY

Customize the mattress band with your hotel logo embroidered.

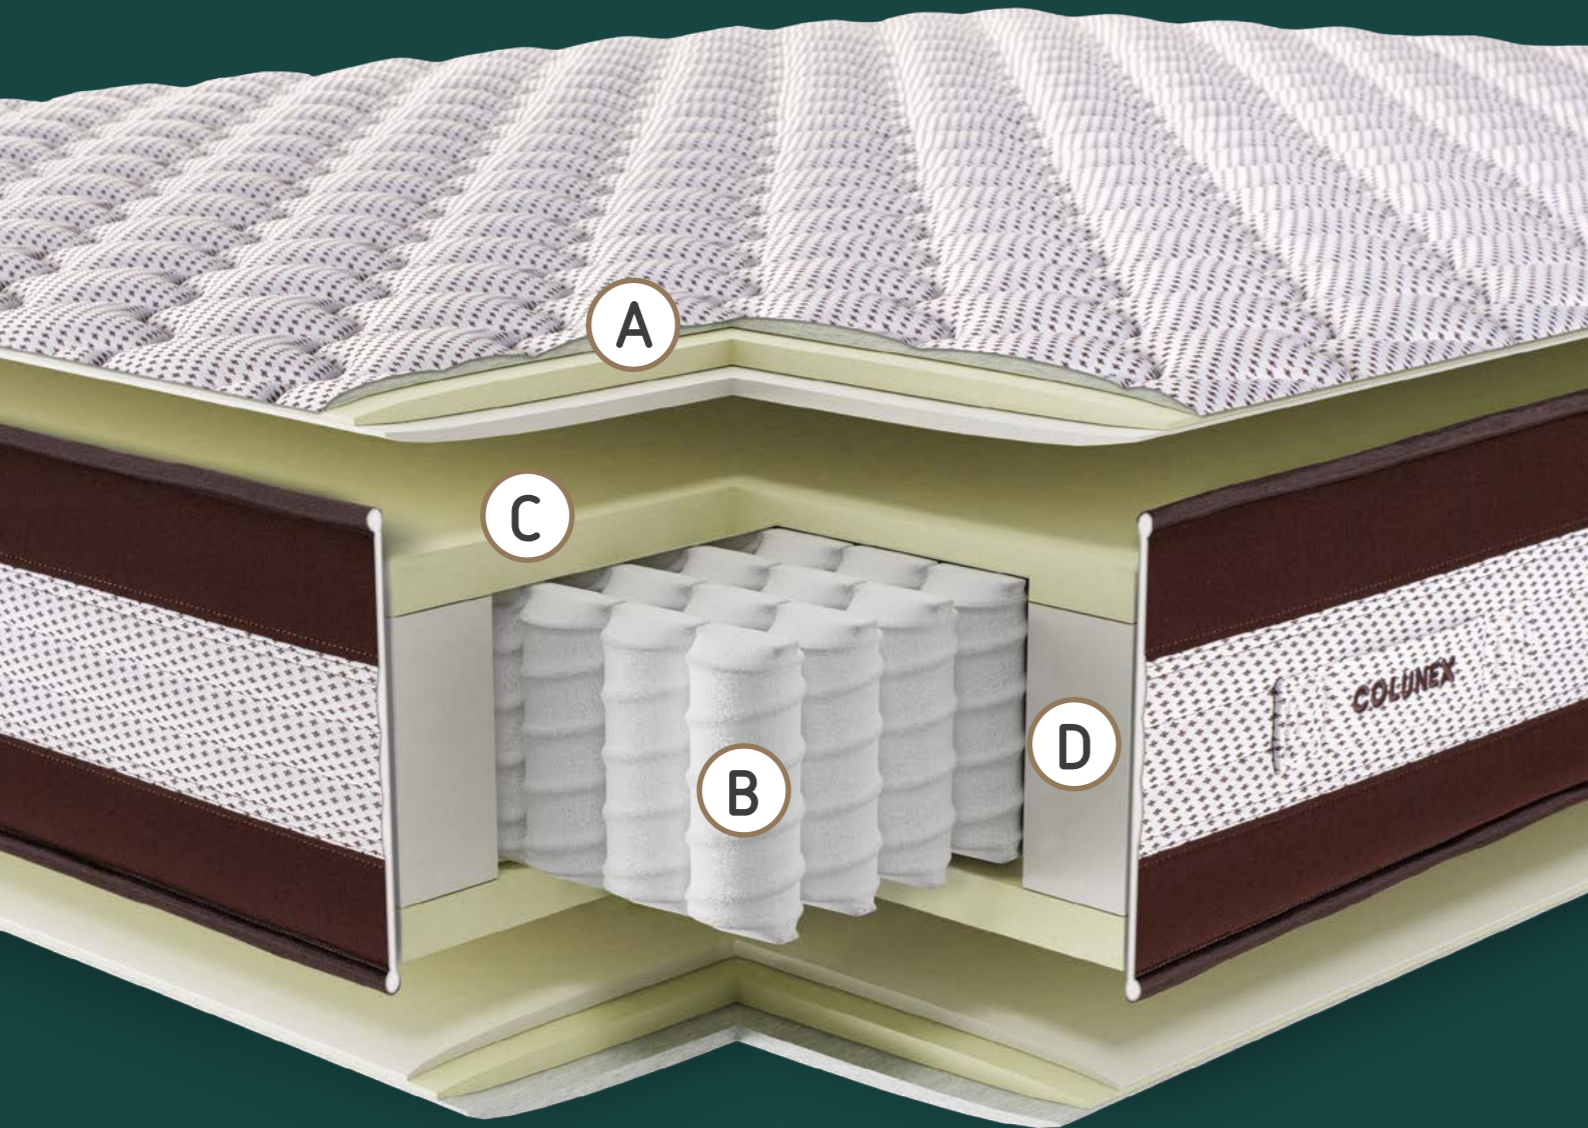

Embroidery

Customize your mattress band

COLUNEX®

CLX25 mattress technical sheet

Two firmnesses

MATTRESS COLLECTION

*Each layer is designed
for your guest to sleep better.*

A. COMFORT AND COZINESS

The padded top is made up of two layers of foam (Nova Foams Soft and Super Soft) and ventilated fibers that ensure optimal surface breathability. The covering mesh is made of fire-retardant and antibacterial Trevira CS fiber, which means that no fire-retardant chemical treatment is required on the mattress surface, thus ensuring that the fire-retardant properties are preserved throughout the mattress's lifespan, as opposed to natural wear of a surface impregnation.

H. INDEPENDENCE OF MOVEMENTS AND DOUBLE COMFORT

This model allows an independent and isolated comfort, which means that in a double bed, the movement of one person is not felt by the other. Additionally, the two sides of the mattress have different firmness, one side is more firm and the other less firm, so that the guest can easily change the desired degree of firmness.

C. BREATHABILITY AND SUPPORT

The open-cell foam used maximizes air circulation in the mattress core. The unique capabilities of this foam also allow the contour of the body to be effectively conditioned and supported by the mattress, leading to greater absorption of the body's pressure points.

D. USE OF THE ENTIRE MATTRESS SURFACE

The foams around the pocket springs make it possible to reinforce the mattress's perimeter, leading to maximum use of the mattress area, even the edges, both for sleeping and sitting. Thanks to these robust foams, the sensation of rolling off the mattress is avoided.

MATTRESS COLLECTION

Each layer is designed for your guest to sleep better.

A. SUPER COMFORT AND WARMTH

The feeling of sleeping on this mattress is described by our customers as "Sleeping in the clouds". Thanks to the integrated topper made up of ventilated fibers, two layers of Nova Foams Super Soft foam and one layer of Nova Foams Soft foam, this model simultaneously provides an effective support and an ideal involvement of the body. The covering mesh is made of fire-retardant and antibacterial Trevira CS fiber, which means that no fire-retardant chemical treatment is required on the mattress surface, thus ensuring that the fire-retardant properties are preserved throughout the mattress's lifespan, as opposed to the natural wear of a surface impregnation.

MATTRESS COLLECTION

*Each layer is designed
for your guest to sleep
better.*

A. GREATER RELAXATION

The mesh used, in addition to incorporating fire-retardant fiber, is also composed of carbon yarn, providing permanent antistatic properties, which allows the body to capture the electrostatic charges and help to relax.

B. TUSSAH SILK COMFORT

The insulating and permeable properties of silk help keep the body at the ideal temperature, providing thermal comfort, and the perfect environment for a regenerating sleep.

C. LINEN BREATHABILITY

The hollow linen fibers allow air to circulate more easily, preventing the mattress from overheating.

D. THERMAL BALANCE OF MERINO WOOL

Merino wool provides ideal thermal comfort, stabilizing the environmental temperature of the mattress depending on the environment in which it is inserted. So, it's cozy in winter and ventilated in summer.

E. EXTRA COZINESS

The two layers of Nova Foams Super Soft foam provide coziness and a soft support.

F. BREATHABILITY AND SUPPORT

The open-cell foam used maximize air circulation in the mattress core. The unique capabilities of this foam also allow the contour of the body to be effectively conditioned and supported by the mattress, leading to greater absorption of the body's pressure points.

Bed Bases Collection

ELITE BED BASE

Exclusive Colunex
Pocket Spring™ technology

EASY BED BASE

Fixed slats technology

BED BASES COLLECTION

The 6 biggest advantages of Colunex bed bases

ANTI-NOISE STRUCTURE

Thanks to the anti-noise system developed by Colunex, we guarantee completely silent nights for all hotel guests.

PERSONALIZATION

Our bed bases are fully customizable, from choosing the ideal height or covering, to applying a bed skirt or a removable cover.

ANTI-VIBRATION STRUCTURE

Thanks to the anti-vibration system developed by Colunex in addition to the mattress movement isolation, your guests will not be awakened by their own movement or the movement of the other person.

OEKO-TEX CERTIFICATE

All our coatings are Oeko-Tex 100 certified, which means that they do not contain substances that are harmful to the body or the environment.

VENTILATED STRUCTURE

The structures of the Colunex bed bases guarantee the circulation of air inside and also the breathability between the bed base and the mattress, which allows for a greater durability of both.

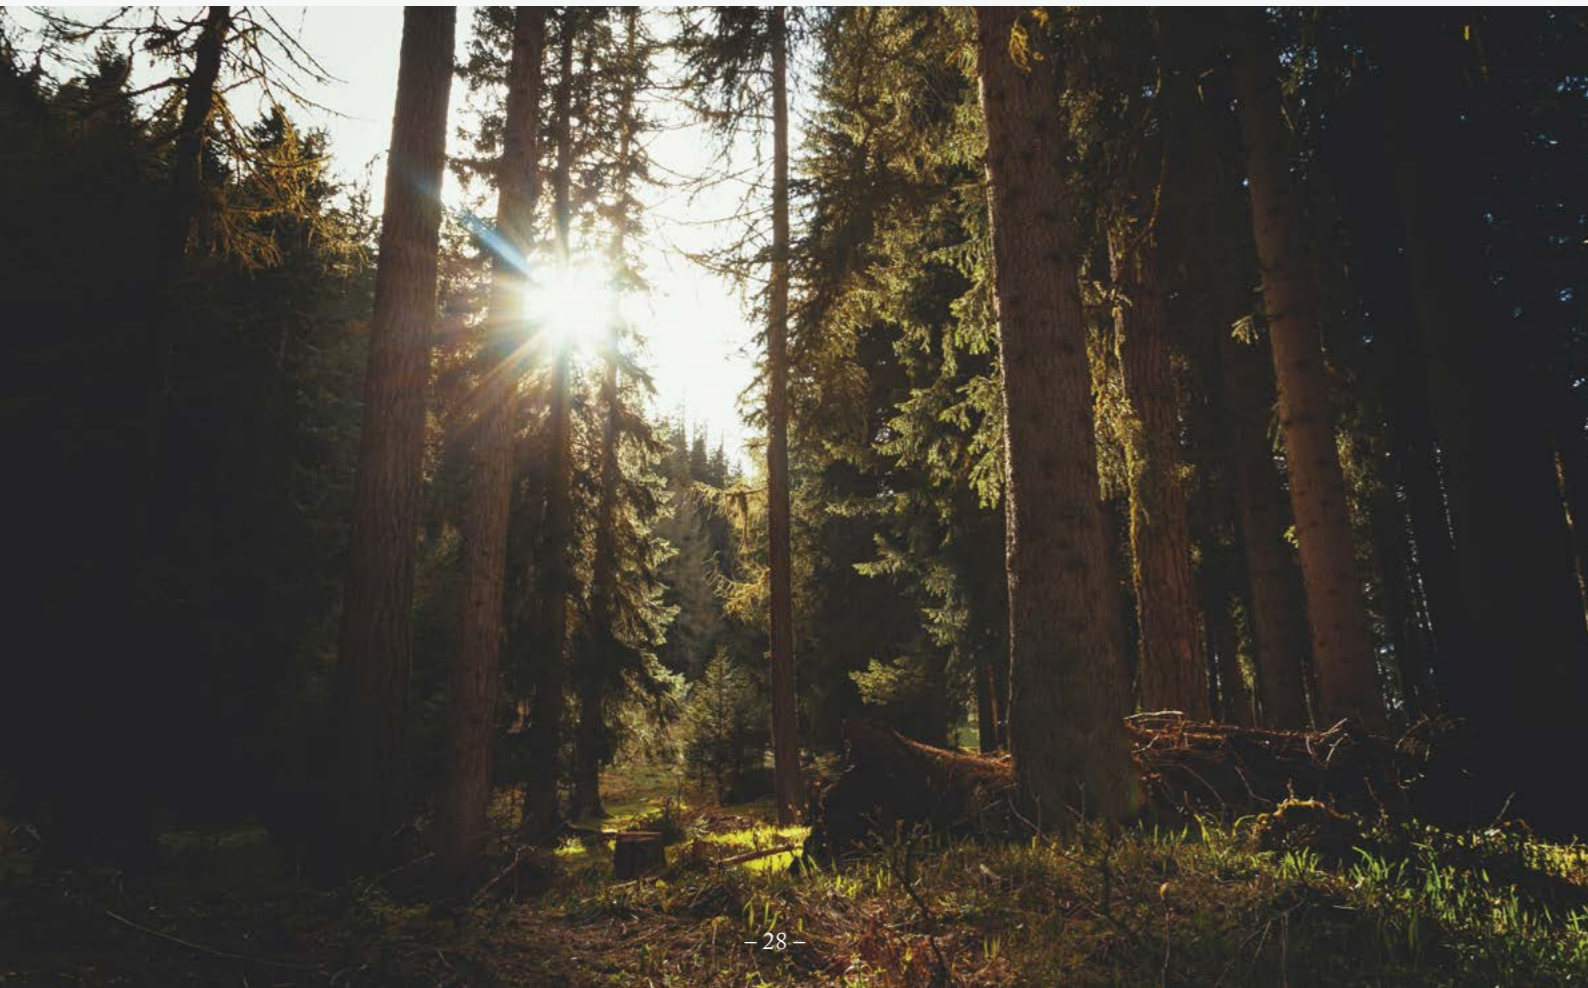

CERTIFIED WOODS

All the plywood in the bed bases comes from controlled forests and is ecologically certified.

We use the best **Certified Wood**

These certificates attest that all the wood used by Colunex derives from controlled forest management, where the 3 pillars of sustainability are consciously applied:
Social, Environmental and Economic

Customize the bed base of your Hotel

FEET OPTIONS

Feet in wood, metal, stainless steel or fabric covered, with different heights and with or without wheels.

FABRICS COLLECTION

Choose the perfect fabric for your project from our wide collection.

BED SKIRT

The skirt gives a more classic look to the bed base. If you want to remove it, the bed base will remain ready to use.

REMOVABLE COVER

The removable cover makes it easy to change upholstery, if you want to renew the look of the room or simply wash the upholstery.

BED BASES COLLECTON

BENEFITS

- ✓ Anti noise
- ✓ Anti-vibration
- ✓ Ventilation

TECHNICAL DETAILS OF THE STRUCTURE:

The Easy bed base has a plywood monoblock structure and eucalyptus plywood slats. The main advantages of eucalyptus wood are:

- No odors;
- Resistant wood to pests and fungi;
- Sustainable and ecological wood, since it is the wood that nature manages to replace in less time and with fewer resources;
- The use of this wood guarantees quality, durability and resistance to the final product,

In order to guarantee high ventilation and aeration of the mattress, the slats have the ideal distance between them.

The width of the slats was defined to allow the most adequate support for the mattress, helping its durability.

WARRANTY: 5 years

CERTIFICATIONS:

PART 1 & 2

UNION SYSTEM FOR BED BASES AND MATTRESSES

Transform a twin room into a double in 90 seconds!

Colunex has developed systems that make it possible to unite mattresses and bed bases. The union is so effective that the customer will practically not feel the joint area.

These systems allow extraordinary flexibility in the management of hotel rooms, transforming a twin room into a double room in just a few seconds.

STEP 1
BED BASES UNION

Metallic system applied under the bed bases. In the case of separate bed bases, the joining system remains hidden.

STEP 2
MATTRESSES UNION

Robust zipper applied to the individual mattresses from end to end, to guarantee a perfect union, being technically impossible to join two mattresses better.

STEP 3
COMFORTER

The comforter promotes extra comfort in addition to eliminating any feeling of joining the two mattresses. The comforter has elastic bands in the corners to ensure stability.

Extra bed with the comfort of the master bed

Colunex's extra bed was developed to provide the guest with the same level of comfort as the main bed in the bedroom, and the same covering as the main bed bade can even be used to maintain aesthetic harmony.

Thanks to this product, it is possible to avoid the usual annoyance and discomfort associated with this type of bed, not being noticeable that you are sleeping in an extra bed.

The comfort and quality of the Colunex extra bed allow the creation of a true triple room.

PRACTICE

The wheels located on the back of the headboard allow, in a vertical position, to move the extra bed in an easy and practical way. The mattress grips the frame so it doesn't tip over while stored.

USEFUL

The removable headboard contains a storage space for the protective bed bag. By attaching it to the bed base, the storage space and the wheels are hidden, allowing the creation of an elegant headboard.

ROBUST

The components used are of high quality, making the structure extremely robust, allowing infinite assembly and disassembly and ensuring the safety of those who assemble and use them.

Sofa-beds

Sofa by day...bed by night.

MATTRESSES

All sofa-beds include two Supernova Foams™ Reflex mattresses, with a removable and washable cover, to maintain their hygiene.

LIFTING SYSTEM

Automatic lifting system, highly durable, robust and safe, which allows placing both mattresses at the same level.

COATINGS

We have a wide range of coverings, so that the sofa bed becomes an appealing design element in the hotel room.

Benefits of Colunex Sofa-beds

- ✓ Durable and safe
- ✓ Useful, versatile and practical
- ✓ Comfortable like a bed
- ✓ Eye-catching design

PILLOWS COLLECTION

The 5 biggest benefits of Colunex Pillows

COMFORT & COZINESS

Colunex pillows allow the release of pressure in the cervical area, supporting the weight of the head and following the contours of the neck.

FRESHNESS AND VENTILATION

All Colunex models have been developed to provide exceptional freshness rates and the perfect thermal balance for a healthy and restful sleep.

DIFFERENT TECHNOLOGIES

Depending on your comfort preferences, we have three design technologies to suit different bodies and sleep patterns.

ANTIBACTERIAL TREATMENT

The meshes and covering fabrics protect the pillows, preventing the mites that cause allergies from settling, consequently leading to greater hygiene and durability.

DURABILITY & HYGIENE

All pillows have specific cleaning instructions, so that you can insure hygiene is fully preserved between the check-in and check-out of guests.

PILLOWS COLLECTION

HYGIENCELL

THE PERFECT PILLOW FOR YOUR HOTEL

Hygiencell fibers allow you to recreate the soft touch of feathers, with the advantage of being washable and hypoallergenic.

The soft touch of Hygiencell fibers ensures comfort in the neck and head region, creating the sensation of sleeping on a cloud. Cotton combines high resistance with a soft and pleasant touch.

Textile Collection

TEXTILE COLLECTION

The 6 biggest benefits of Colunex textiles

COMFORTERS

Increase the comfort of your hotel's mattress, and disguise the union of mattresses.

PROTECTORS

Ensure the perfect protection of your hotel's mattresses and pillows with our waterproof protectors.

DUVETS

Provide maximum comfort to your hotel guest with a soft, highly hygienic and hypoallergenic duvet.

COMFORT

Thanks to the high quality of the materials used and the high technology associated with each one of them, we guarantee all these benefits without compromising comfort and softness to the touch.

ANTIBACTERIAL TREATMENTS BI-OME AND AEGIS

Thanks to antibacterial properties, it is possible to minimize the development of bacteria and odors, which guarantees optimal freshness and a healthy sleep.

HYGIENE

In order to guarantee the hygiene and durability of the textiles, all of them are machine washable.

HYPOALLERGENIC PRODUCTS

All textiles are hypoallergenic, anti-bacterial and anti-fungal, ensuring a healthy sleep.

DURABILITY

Thanks to the high quality of the materials used, we guarantee an excellent durability of the textiles.

BESPOKE TEXTILES

Colunex textiles can be produced in any size you need.

Comforters

The two Colunex comforter options are the ideal element if you want to add comfort to a firmer mattress. It is also perfect for reducing the feeling of joining the mattresses. The elastics in the corners serve to guarantee the stability of the comforter.

COMFORTER I

FILLING: One layer of ventilated fibers 250g/m²

OUTER FABRIC: 100% Percal Cotton

COMFORTER II

FILLING: Two layer of ventilated fibers 250g/m²

OUTER FABRIC: 100% Percal Cotton

Hygiencell Duvet

Hygiencell fibers allow you to recreate the soft touch of feathers, with the huge advantage of being washable and hypoallergenic.

With exclusive Hygiencell filling and 100% Egyptian cotton outer fabric, the duvet is light, comfortable and resistant to use.

Hygiencell fibers are hypoallergenic, anti-mite, anti-bacterial and anti-fungal.

The duvet is machine washable, so maintain the hygiene necessary for a healthy and fresh sleep.

Additionally, the duvet has ties at the ends so you can join two duvets together, in order to achieve the ideal and personalized thermal comfort for your hotel guest.

HEADBOARDS COLLECTION

The 6 biggest benefits of Colunex headboards

VARIETY OF MODELS

We have more than 30 headboard models, so you can choose the design that best suits your project and room style, from presidential suites to family rooms.

DURABILITY

We have zero complaints, since the first Hotel supply in 2003.

CUSTOMIZATION AND DESIGN

Thanks to a total in-house production, we offer the possibility to choose materials, colors, dimensions and much more. We create exclusive and customized solutions for each project, and we can produce unique models for you.

QUALITY

We manufacture all our products and use the best national and international selection of materials and textiles, so that we can continuously ensure the best possible quality.

OEKO-TEX CERTIFICATE

All our coatings are Oeko-Tex 100 certified, which means that they do not contain substances that are harmful to the body or the environment.

SECURITY AND GUARANTEE

Colunex products exceed the most stringent international safety and warranty standards. Each product that leaves our facilities undergoes the most thorough quality control.

HEABOARD COLLECTION

IN-HOUSE DESIGN STUDIO

Thanks to our verticality, we are able to fully customize our products. Thus, we make it possible to create exclusive and tailor-made solutions.

Our goal is to continue to push the limits and be able to offer a more restful sleep, in a luxurious, pleasant and comfortable environment.

Colunex products are unique and fully customizable...
your dream is our limit!

HEABOARD COLLECTION

Customize your hotel headboard

LED

Possibility of incorporating LEDs, an elegant and practical option, especially for those who like to read in bed.

SWITCHES

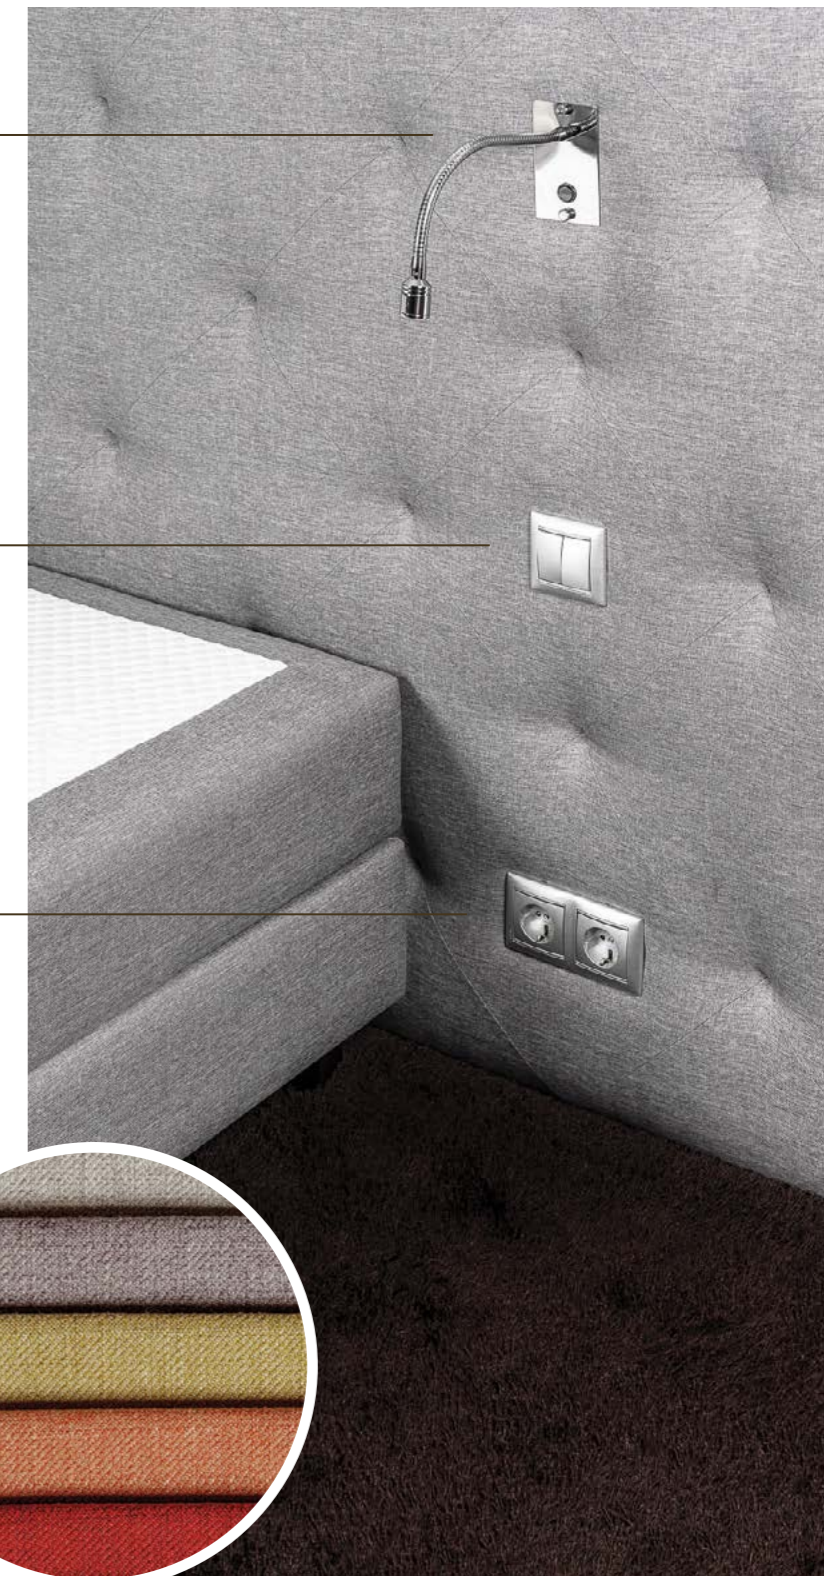

Possibility of embedding switches or home automation controls.

PLUGS

Possibility of embedding sockets or USB connections.

COATINGS

Choose the ideal fabric for your project, within our extensive collection.

COLUNEX®

*With Colunex your
guest can sleep with a
clear conscience.*

We produce in order to have a huge impact on your life,
but a small impact on the planet.

Our products are developed and produced with the aim of
being long lasting, which means you don't need to change
hotel mattresses and beds so often.

We are committed to gradually becoming more eco-efficient
and in minimizing the energy consumption of our facilities.

We avoid waste by giving a second life to our raw material leftovers.

We incorporate them in our brand merchandising and share with our employees,
so that they can reuse at home with imagination and art.
